CAREER OBJECTIVE

B.Tech graduate in Electronics & Communication Engineering and MERN-stack developer with hands-on experience building and deploying full-stack web applications, including real-time systems with WebSockets and RESTful APIs. Seeking a Software Engineer role to apply strong problem-solving skills and a track record of shipping working, production-style projects.

EDUCATION

Electronics & Communication Engineering, B.Tech Ramachandra College of Engineering, Eluru	2022 – 2026
Intermediate (MPC) Sri Chaitanya Junior College, Eluru	2020 – 2022
SSC (10th Standard) Z.P.P. High School, Vasanthawada	2019 – 2020

SKILLS

Languages — JavaScript (ES6+), Python

Frontend — React.js, Tailwind CSS, HTML5, CSS3

Backend — Node.js, Express.js, RESTful API Design, WebSockets

Databases — MongoDB, MySQL

Authentication & Security — JWT, Cookie-based Session Handling, Role-based Authorization

Deployment & Hosting — Vercel, Render, Netlify

Fundamentals — Object-Oriented Programming (OOP), Data Structures

Tools & Platforms — Git, GitHub, Postman, VS Code

PROJECTS

EchoRoom — Real-Time Chat Application | GitHub: [Repository Link](#)

- Built a real-time, room-based chat application using WebSockets, enabling low-latency bidirectional communication across multiple concurrent rooms.
- Designed a backend architecture that cleanly separates HTTP API routes from persistent WebSocket connections, improving maintainability and scalability.
- Implemented secure authentication using JWT with cookie-based session handling to protect user sessions.
- Persisted chat history in MongoDB, allowing users to retrieve full conversation history on reconnect or re-login.
- Developed a responsive React frontend with clean, centralized state management for real-time UI updates.

QuickBuy — Full-Stack E-commerce Platform | GitHub: [Repository Link](#)

- Developed a full-stack e-commerce application on the MERN stack (MongoDB, Express.js, React, Node.js) supporting both customer and seller workflows.
- Implemented JWT-based authentication with role-based authorization to separate customer and seller permissions.
- Built RESTful APIs for product catalog management, cart operations, and end-to-end order processing.
- Designed reusable React components and a responsive UI to support real-world multi-device usage.
- Deployed the application for live access and testing, handling environment configuration and build setup.
